

Southeastern Electric Cooperative Distributed Resource Interconnection Application

WHO SHOULD FILE THIS APPLICATION: Anyone (DR Owner/Operator/Applicant) expressing interest to install Distributed Resources (DR) which will interconnect with the Southeastern Electric Cooperative Electrical Power System (EPS). This application shall be completed and returned to the Cooperative in order to begin processing the request.

INFORMATION: This application is used by the Cooperative to perform a preliminary interconnection review. The Applicant shall complete as much of the form as possible. The fields in **BOLD** are required to be completed to the best of the Applicant's ability. The Applicant will be contacted if additional information is required.

COST: An Applicant intending to operate generation over 150 kW and less than 10 MW nameplate capacity in parallel with the Cooperative electrical distribution system is required to pay \$TBD for initial interconnection/transmission studies. This payment shall be included with this application. Additional fees may be required. Any unspent funds will be returned upon completion of the initial studies.

Pre-Certified System: Yes / No (Circle one)

ESTIMATED LOAD INFORMATION

The following information will be used to help properly assess the interconnection. This information is not intended as a commitment or contract for billing purposes.

Minimum anticipated load (DR not operating):	kW:	kVA:
Maximum anticipated load (DR not operating):	kW:	kVA:

ESTIMATED START/COMPLETION DATES

Construction start date:	Completion (operational) date:
--------------------------	--------------------------------

DESCRIPTION OF PROPOSED INSTALLATION AND OPERATION

Attach a single line diagram showing the switchgear, transformers, and distributed resource facilities. Give a general description of the manner of operation of the distributed resource (base load generation, cogeneration, energy storage, closed-transition peak shaving, open-transition peak shaving, emergency power, etc.). If there is intent to sell power and energy, define the target market. Also provide any other relevant information.

Southeastern Electric Cooperative Distributed Resource Interconnection Application

With this Application, we are requesting the Cooperative to review the proposed Distributed Resource System Interconnection. We request that the Cooperative identify the additional equipment and costs involved with the interconnection of this system and to provide a budgetary estimate of those costs. We understand that the estimated costs supplied by the Cooperative will be estimated using the information provided. We also agree that we will supply, as requested, additional information, to allow the Cooperative to better review this proposed Distributed Resource System interconnection. We have read the "Interconnection Requirements for Customer-Owned Distributed Resources" and will design the Distributed Resource System and interconnection to meet those requirements.
